About Me

A Computer Science student with hands-on internship experience as a Backend Developer, specializing in E-commerce platform development. Expert in designing efficient Database Schemas and integrating RESTful APIs for complex systems. Committed to applying logical problem-solving skills and high attention to detail to deliver high-quality software solutions for Thai NS Solutions Co., Ltd.

Experience

Backend Developer Intern | May 2025 – October 2025

Project: LaraClassifier (Web Classified / E-commerce System)

- **API Development:** Developed and optimized RESTful APIs using Next.js (App Router) to enhance system performance and scalability.
- **System Migration:** Successfully migrated the legacy system from Laravel (Monolithic) to a modern API-based Architecture.
- **Database Management:** Designed and implemented efficient Database Schemas using Prisma ORM and MySQL.
- **Feature Implementation:** Developed core e-commerce functionalities, including User Authentication, Product Posting, Saved Posts, and an internal Messaging System.
- **System Integration:** Managed secure authentication flows and ensured seamless data synchronization across the platform.

Education

Maejo University | Chiang Mai, Thailand

Bachelor of Science (B.Sc.), Computer Science GPA: 3.45 / 4.00 [2022 –2026]

SKILLS

Languages & Core Tech:

- Proficient: JavaScript (ES6+), TypeScript, PHP
- Web Standards: HTML5, CSS3, JSON

Frameworks & Libraries:

- Backend: Next.js (App Router), Express.js, Laravel
- Database & ORM: MySQL, PostgreSQL, Prisma ORM

Technical Proficiencies:

- Architecture: RESTful API Design, MVC Architecture, API-based Architecture
- Security: JWT Authentication, Middleware, Data Encryption
- Concepts: CRUD Operations, Database Schema Design, System Migration
